Section - A

Chapter 01

Biomolecules, Metabolism and Catalysis

Unit I	Amino Acids and Proteins	1–22
	<i>This chapter includes questions from</i>	
	Amino acids and Peptides	
	Protein structure	
	Globular and Fibrous proteins	
	Protein techniques	
	Protein sequencing	
	Amino acid metabolism	
Unit II	Nucleic Acids	22–32
	<i>This chapter includes questions from</i>	
	Nucleosides and Nucleotides	
	Nucleic acids	
	DNA	
	RNA	
	Electrophoresis and Sequencing	
	Nucleotide metabolism	
Unit III	Carbohydrates and Lipids	33–45
	<i>This chapter includes questions from</i>	
	Monosaccharides and Disaccharides	
	Polysaccharides	
	Glycogenesis, Glycogenolysis and Gluconeogenesis	
	Fatty acids	
	Triacylglycerol, Phospholipid and Glycolipid	
	Cholesterol and Lipoproteins	
	Fatty acid metabolism	
	Cholesterol metabolism	

Unit IV	Enzymes and Vitamins	46–56
	<i>This chapter includes questions from</i>	
	Enzymes: General features	
	Enzyme kinetics	
	Enzymatic inhibition	
	Regulatory enzymes	
	Enzymatic reactions	
	Vitamins	
	<i>Answer</i>	

Chapter 02

Cell Biology

Unit I	Cell structure and function	61–91
	<i>This chapter includes questions from</i>	
	Eukaryotic cell: Structure and function	
	Plasma Membrane: Structure and transport	
	Membrane transport	
	Membrane potential	
	Endoplasmic reticulum	
	Golgi complex	
	Lysosome	
	Intracellular trafficking	
	Cytoskeleton and Motility	
	Extracellular matrix and Cell junctions	
	Mitochondria and Chloroplast	
	Peroxisomes	
	Nucleus	
Unit II	Cell signaling, Cell cycle and Cancer	92–111
	<i>Answer</i>	

Chapter 03

Plant Physiology

Unit I	Respiration	117–126
	<i>This chapter includes questions from</i>	
	Glycolysis and Fermentation	
	Krebs cycle	
	Oxidative phosphorylation	
	Pentose phosphate pathway	

Unit II	Photosynthesis	126–141
	<i>This chapter includes questions from</i>	
	Photosynthesis: General features	
	Light reactions	
	Calvin cycle	
	Photorespiration, C ₄ and CAM pathway	
	Transport of photoassimilate	

Unit III	Transport, Mineral nutrition and Plant growth	142–156
	<i>This chapter includes questions from</i>	
	Plant water relationship/Transport of minerals and water	
	Transpiration, Plant nutrition, Plant hormones	
	Photomorphogenesis and Vernalization	
	Seed physiology, Plant movements	
	<i>Answer</i>	

Chapter 04

Human Physiology	159–175	
	<i>This chapter includes questions from</i>	
	Nervous system, Sense organs	
	Blood vascular system	
	Respiratory system	
	Excretory system	
	Digestive system	
	Reproductive system	
	Endocrine system	
	<i>Answer</i>	

Chapter 05

Genetics

Unit I	Classical Genetics	177–188
	<i>This chapter includes questions from</i>	
	Mendel's principle	
	Linkage and Mapping	
	Sex determination and Sex-linked inheritance	
	Quantitative inheritance	
	Cytogenetics	

Unit II	Molecular Genetics	189—242
	<i>This chapter includes questions from</i>	
	DNA Replication	
	Genome complexity	
	Transposable elements	
	Satellite DNA	
	Gene families	
	Transcription	
	RNA processing	
	Prokaryotic gene regulation	
	Eukaryotic gene regulation	
	Genetic switch	
	DNA binding motifs	
	Genetic code	
	Ribosomes and tRNAs	
	Protein synthesis	
	DNA recombination	
	DNA repair	
	Gene mutation	
	<i>Answer</i>	
Chapter 06		
	Recombinant DNA technology	247—262
	<i>This chapter includes questions from</i>	
	Enzymes	
	Vector	
	DNA cloning and PCR	
	Protein expression	
	DNA library	
	Engineering plants and animals	
	Sequencing/Blotting/Electrophoresis/Labelling	
	Applications of recombinant DNA technology	
	<i>Answer</i>	
Chapter 07		
	Prokaryotes and Virus	265—281
	<i>This chapter includes questions from</i>	
	Bacterial cell structure	
	Bacterial growth and Cultivation	

Bacterial groups
Archaeobacteria
Bacterial genome
Gene transfer and recombination
Toxins
Virus
Viroids and Prions
Antibiotics
Miscellaneous
Answer

Chapter 08

Immunology

283—302

This chapter includes questions from
Innate and Adaptive immune response
Adaptive immunity
Cells and organs of the immune system
Antigens
MHC and Antigen presentation
Antibodies: Structure and Function
Organization and Expression of Ig genes
Antigen-antibody interactions: Principles and applications
B-cell: Generation, activation, differentiation and Response
T-cell: Maturation, activation, differentiation and Response
Cytokines and Complement system
Hypersensitivity and Autoimmunity
Vaccine
Answer

Chapter 09

Diversity of Life

305—315

This chapter includes questions from
Taxonomy
Monera
Protists
Fungi
Animals
Plants
Answer

Chapter 10

Ecology and Evolution

Unit I	Ecology	317–324
	<i>This chapter includes questions from</i>	
	Ecosystem	
	Biotic community and Succession	
	Population ecology	
	Biodiversity	
Unit II	Evolution	324–330
	<i>This chapter includes questions from</i>	
	Evolutionary principles	
	Population genetics	
	<i>Answer</i>	

Section - B

(Unit-wise distribution of questions based on CSIR-JRF-NET Syllabus)

Chapter 01	
Molecules and their interactions relevant to biology	333–351
Chapter 02	
Cellular organization	352–376
Chapter 03	
Molecular Genetics	377–408
Chapter 04	
Cell signaling and Immunology	409–426
Chapter 05	
Developmental Biology	427–446
Chapter 06	
System Physiology – Plant	447–472
Chapter 07	
System Physiology – Animal	473–494
Chapter 08	
Inheritance Biology	495–522
Chapter 09	
Diversity, Ecology and Evolution	523–566
Chapter 10	
Biotechnology and Biophysical techniques	567–596
